PROFILE

Analytical and detail-oriented graduate with hands-on experience in **Python, SQL, data analysis, machine learning, and data visualization**. Experienced in cleaning and transforming datasets, performing exploratory data analysis, engineering features, and developing data-driven solutions. Strong problem-solving and analytical skills with an interest in applying data to real-world business problems.

CORE SKILLS

Programming	Python, SQL, MATLAB, Java
Data Analytics	Pandas, NumPy, Data Cleaning, Exploratory Data Analysis, Feature Engineering, Statistical Analysis
Data Visualization	Matplotlib, Plotly, Dashboard Development
Machine Learning	Scikit-learn, Classification, Regression, Model Evaluation, Predictive Analytics
Tools	Git, GitHub

FEATURED ANALYTICS PROJECT

Sales Performance & Customer Analytics

Business Analytics Project

Python | SQL | Pandas | Power BI

- Analyzed transactional retail data to identify revenue trends, customer behavior, product performance, and regional sales patterns.
- Used SQL to clean, transform, aggregate, and analyze order, customer, product, and regional datasets while calculating key business KPIs.
- Performed exploratory data analysis using Python and Pandas to identify seasonal trends, high-value customers, and underperforming product categories.
- Designed an interactive Power BI dashboard tracking revenue, orders, average order value, customer contribution, profitability, and regional performance.
- Translated analytical findings into business recommendations related to customer retention, product strategy, and revenue growth.

TECHNICAL PROJECTS

Smart Wearable Spine Guard

Jan 2026 – May 2026

Python | Machine Learning | IoT | Data Analytics

- Developed an IoT-enabled posture monitoring system generating multimodal datasets from IMU, flex, and pressure sensors.
- Built Python-based preprocessing and feature-engineering pipelines to transform raw sensor readings into structured datasets.
- Trained and evaluated machine learning models for posture classification and analyzed model performance using evaluation metrics.
- Developed a real-time analytics dashboard to monitor sensor data and present posture-related insights.

MediScan AI – Diabetic Retinopathy Detection

Jan 2025 – Apr 2025

Python | Scikit-learn | KNN | SVM

- Developed a machine-learning-based healthcare application for diabetic retinopathy detection using image-based data.
- Applied data preprocessing and classification techniques using KNN and SVM to develop the prediction pipeline.
- Evaluated model performance and integrated the machine learning pipeline into a web-based application.

EDUCATION

B.Tech. – Electronics and Telecommunication Engineering

2022 – 2026

PCCOE, Pune

CGPA: 8.27

Class XII – CBSE

2022

Sharad Pawar International School, Nashik

85%

LEADERSHIP & INVOLVEMENT

Dance Club Head – Art Circle, PCCOE

Led rehearsals and coordinated **30–40 dancers** for college performances and events.

Co-Secretary – Art Circle, PCCOE

Coordinated event schedules, team activities, and participation across college events.

ACHIEVEMENTS

- 1st Place** – Intra-College Project Exhibition, Machine Learning Based Diabetic Retinopathy Project.
- 2nd Place** – Build Bridge Battle, CEISA Event 2024.
